

EntriWorX Door Insights

Access to insights for smart building operations

Complete control

Transform the way you see and manage your doors with EntriWorX Door Insights. However large your installed automatic door base is our easy-to-use EntriWorX Insights application lets you see operational data at a glance across your network of connected doors.

Connected doors

Using the power of digitalization EntriWorX Door Insights connects to new or existing dormakaba automatic doors to securely expose key operational data.

Real-time

Continuous synchronization means information about the operational state of your door is always immediately available. You can access your data at any time and from anywhere.

Door insights

Our highly intuitive, visually engaging web application 'EntriWorX Insights' transforms your data into meaningful, actionable and understandable Insights.

React instantly to solve door issues

With real-time notification of events such as blockages or malfunctions, you can cut unplanned interruptions – about 50% of alerts can be corrected quickly and easily by your own team.

Get real-time insights anywhere

Our cloud-based data management allows remote monitoring of multiple, installed systems.

Security when it counts

Know that your entrances are locked and secure when they should be and open and accessible when they need to be with real-time monitoring of the PGS mode and lock status.

Preventive maintenance

IoT and "Always On" allow operations, maintenance and repair to be adapted to current needs as opposed to strict maintenance schedules.

EntriWorX Door Insights: Your benefits

Optimize efficiency

Historic insights enable data-driven optimization of service scheduling and prevention-focused maintenance tailored to the specific door.

Hassle-free user access

Inbuilt user management means you're in full control of who can access door insights for your company.

No limits on how many users you can enable, and with administration and viewer level access you can give the right privileges to the right people and employees.

Flexible, scalable hardware

Our Entrivo IoT connector or EntriWorX Unit is simple to install and requires no expensive infrastructure to connect or maintain.

No limit on the number of devices you can connect means you can gain remote, centralized visibility over your entire installed automatic door base, no matter how large or geographically spread.

Simple and intuitive

View not only a single door but your entire network of connected doors in a single, centralized dashboard.

Thanks to clear, highly visual and interactive graphics, information and data patterns are quick and easy to understand without any specialist knowledge.

With simple tab-based navigation, interactive door maps, built-in search, advanced filters and more, you can easily find what you're looking for, no matter how many automatic doors you have.

Real-time insights from anywhere

Remote, online overview of large or decentralized installed base.

Everyone in your organization who needs to know can use EntriWorX Door Insights on any device, from anywhere and anytime.

Every user can subscribe to real-time alert notifications.

Curious?
We'll be glad to advise you.
