dormakaba

Get Connected: Upgrade Your Doors
For smarter, more efficient door management

Upgrade Your Door to a Connected Smart Solution

Embrace the future of door technology by upgrading to a smart, connected door with our advanced IoT connectivity solutions.

With no need for specialized infrastructure or intricate network prerequisites, EntriWorX Insights seamlessly links up with both new and existing dormakaba entrance systems. This connection ensures the secure transmission of crucial performance, operational, and error data—whether for a single door or your entire network.

This upgrade brings a host of benefits, including enhanced control, real-time monitoring, strengthened security, increased efficiency, and a positive impact on sustainability.

Step into the future and transform your entrance with an upgrade!

Get connected

Upgrade to a smart door with our IoT connectivity solutions for enhanced control and convenience. Experience the benefits of remote monitoring and resolution.

Strengthen security

Know that your entrances are locked and secure when they should be, and open and accessible when they need to be, with real-time monitoring of the door mode and lock status.

Bolster uptime

Ensure continuous operation by receiving instant notifications, accessing troubleshooting instructions instantly, and benefiting from remote support by dormakaba.

Increase efficiency

Historic insights enable data-driven optimization of service scheduling and prevention-focused maintenance tailored to the usage of the specific door.

Improve sustainability

Upgrading to a connected door brings sustainability benefits by reducing technician call-outs (remote resolution), ensuring swift restoration to protect your physical and climate environment.

Simple to install

Not much bigger than a pack of cards and installed in the operator housing, the IoT connector is fast and simple to install on existing and new dormakaba entrance systems.

Factsheet

Upgrade to a Smart Door for Real-Time Insights

EntriWorX Insights

Upgrade your automatic doors to connected doors and experience EntriWorX Insights, the solution that keeps you connected and informed about your doors at all times. Whether you oversee a vast multi-location building or run a small business, EntriWorX is specifically designed to enhance your operations, making them more efficient and effective than ever before. With real-time information at your fingertips, you can now manage your doors seamlessly, and you can also enable dormakaba to provide remote support whenever you need it. Experience a new level of door management convenience with EntriWorX Insights.

What is EntriWorX Insights

Connected doors
With no specialist infrastructure or network requirements, EntriWorX Insights connects to new, or existing dormakaba entrance systems to securely expose key performance, operational and error data for a single door, or your entire network.

Real-time
Always-on connectivity means critical parameters are monitored in real-time, allowing action to be taken immediately, even remotely, in the event of an operational anomaly. Enabling the reliable, available, and safe operation of your doors at all times.

Door insights
Our intuitive web application, 'EntriWorX Insights,' seamlessly transforms your data into actionable insights that are both meaningful and easy to understand. Receive monthly analysis reports directly in your email inbox, equipping you with essential information to make informed decisions.

Advantages at a glance

Operational Efficiency	Faster Issue Resolution	Premium Service Support	Door Transparency Anywhere, anytime	Data-driven Servicing and Repairs	Integration into Smart Buildings
