

A simple, secure and flexible access solution in the cloud

MATRIXaaS by dormakaba

High Security. Low Maintenance.

Simplify safety and security

With MATRIX as a Service (MATRIXaaS) your business has all the advantages of the comprehensive MATRIX access control software without having to worry about IT infrastructure.

At the same time, clear and easily customizable cloud license levels ensure good cost transparency and flexibility.

Ideal for medium sized companies or start ups, it's an easy and secure way to manage your access control, enabling you to focus on what matters most to your business.

Our cloud solution MATRIXaaS is regularly tested and certified by independent testing institutes with every new release.

Instant, intuitive, always up to date

Thanks to modern web technology, the user interface can be operated from almost any device with a browser without the need to install additional software.

Intuitive to use on PC, tablet or smartphone, our browser based solution completely eliminates the need for installation on end devices, specialized staff, servers or ongoing maintenance. Instead, MATRIXaaS is an uncomplicated answer that's always up to date and always secure. The modern design automatically adjusts to any browser window and has a multilingual and password protected interface.

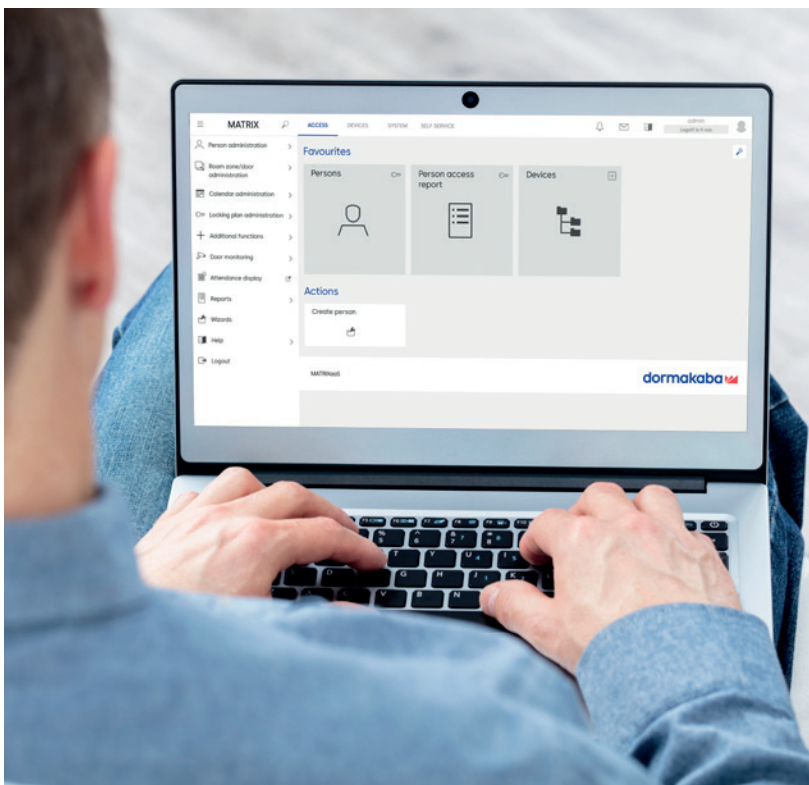

Accessibility aspects are also taken into account by the web interface and colors and icons are aligned with the needs.

Complete peace of mind

Stay protected with our
reliable MATRIX IoT connector
and top-tier compliance

Communications between all your hardware components and MATRIXaaS always occurs safely and securely via the MATRIX IoT connector. Should the connection be interrupted, the system switches to 'standalone operation' and your access control continues working securely.

Tested by an independent and reputable institute, you can expect only the highest standards in compliance, cyber security and data protection.

Simple

Ready in no time

We provide MATRIXaaS according to your needs and ensure rapid provision of the cloud instance. The modern, multilingual interface is intuitive to use.

Predictable costs

No need to invest in buying and operating your own server hardware. Instead, benefit from predictable yearly costs.

Strong

Increased security

A professionally hosted system gives you maximum cybersecurity, full compliance and possible GDPR-compliant operation.

High reliability

Regular updates and maintenance increase reliable operation. We also offer optional support with the commissioning and system configuration.

Flexible

Stay up to date

The automatic rollout of new releases from the cloud means your access control system is always up to date.

Scalable for the future

More people, more devices, more admin users: simply increase the scale without having to relicense.

The right access, every time

More options

Enjoy an almost unlimited variety of applications, whether wired, stand alone or wirelessly integrated into the system. Plus, a wide range of hardware components and access media.

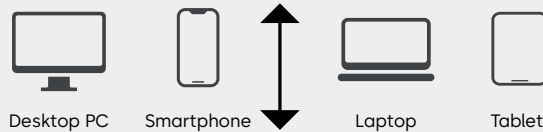

More convenience

Bespoke media definitions are supported as well as customized applications for your ease.

More ease

Your electronic access control system can be utilized across all these connection types:

- Online
- Wireless online
- Whitelist access
- Access on Card
- Mobile access

Functionality for your needs

MATRIXaaS delivers extensive functions, with a range of customer solutions suited for people, service or security access requirements.

Your complete access control starts today

Existing dormakaba access components can be seamlessly integrated - there's no need to replace MATRIX hardware. Mixed operation of online and standalone components is possible.

Our Sustainability Commitment

We are committed to foster a sustainable development along our entire value chain in line with our economic, environmental and social responsibilities toward current and future generations. Sustainability at product level is an important, future-oriented approach in the field of construction. In order to give quantified disclosures of a product's environmental impact through its entire life cycle, dormakaba provides Environmental Product Declarations (EPD), based on holistic life cycle assessments.
