

Security and convenience can be so **easy!**

The new reversible key system with a profile dormakaba revy

revy by **dormakaba**

Everything **easy** with revy!

revy from dormakaba is **the new reversible key system with a profile** that makes secure access very easy – whether for your detached house, residential complex, or company building.

revy incorporates all the know-how and **experience of the inventor of the reversible key**. dormakaba has continuously optimized this system over the last 90 years.

Jointly developed by teams in Switzerland and Austria and manufactured in Austria, revy **sets new standards for security and convenience at an amazingly affordable price.**

Insert the key?

Easy!

You'll feel it immediately: the revy reversible key sits comfortably in your hand. You can **insert it into the locking cylinder any way you like**. Its **patented rounded tip** makes this even easier. The key also has **no sharp edges** and is therefore gentle on clothing and bags. The high-quality key is made of robust nickel silver for a **long service life without requiring a lot of maintenance**.

Protection against burglary?

Easy!

With smart technical details, revy exceeds **the high standards of current security norms.**

- **EN 1303:** key-related security up to grade 6 and attack resistance class D for versions with steel reinforcement in the housing
- **Optional:** VdS class B+ and BZ+ for corresponding special versions
- **Fire protection:** locking cylinders tested in accordance with EN 1634-1 and EN 1634-2

Protection against illegal key copies? Easy!

Patent

Trademark
protection

Security card

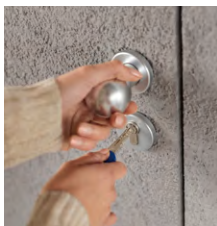

revy is **permanently protected by trademark and patent law**. A European patent has currently been granted for the system EP4148212B1* valid until 2042. Two further patents are pending: WO2023041517A1** and DE102022109467A1**. They offer legal protection against illegal key copies. At the same time, the sophisticated technical design of revy makes it very difficult to make unauthorized copies.

Only selected dormakaba partners with approved key-cutting machines are permitted to manufacture revy locking cylinders and cut keys. Cylinders are **supplied with a security card**. The partners are contractually obliged to produce **duplicate keys only upon presentation of the security card**.

* Not valid in all countries - for more details see worldwide.espacenet.com

** are in "patent pending" status

Open all doors with one key? **Easy!**

If you choose the revy reversible key system for your home, you can **save yourself the annoying search for the right key in future**. Whether it's the front door, garage, letterbox, cellar door, garden gate or bicycle shed – you only need one key on your key ring for all of them. You can also be sure that **your property is perfectly protected all round**.

Tailor-made access for residen- tial complexes and businesses? Easy!

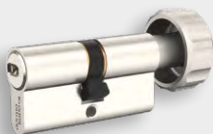

The revy reversible key system offers you all the options you need to easily implement **even larger and more complex locking systems**. For example, you can regulate **access to shared areas and private apartments in residential complexes** or allow different access rights for employees in company buildings.

Locking cylinders and functions for your requirements? **Easy!**

revy offers **different cylinder designs** so that you can always find the right solution for your needs:

Double cylinders so that doors can be locked from both sides

Thumb turn knob cylinders, e.g. to lock and unlock the front door from the inside without a key

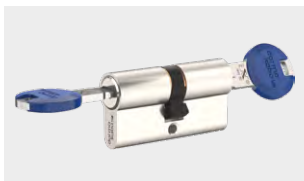

Half cylinders for a cellar door, for example, which is only locked from one side

Sheet metal mounting cylinder for easy installation on the letterbox

Padlock for flexible use

BSZ – available for revy 10 / 20 / 30

VPP – available for revy 10 / 20 / 30

SUZ – available for revy 20 / 30

SIS – available for revy 20 / 30

Key left inside? **Easy!**

The **double-sided lockable cylinder (BSZ)** allows the doors to be unlocked from the opposite side with an authorized key when the key is inserted on one side. (This works on both sides of the double cylinder.)

BSZ – available for revy 10 / 20 / 30

Fend off an attack from outside? **Easy!**

The **pull protection version (VPP)** with a steel bar in the cylinder provides significantly increased pull protection that meets the attack resistance class of DIN EN1303 and VdS BZ.

VPP – available for revy 10 / 20 / 30

Need to change the key? **Easy!**

With the **self-adjusting locking cylinder (SUZ)**, the locking of the cylinder can be changed at a later date – without additional tools and without replacing the locking cylinder.

SUZ – available for revy 20 / 30

Protection from dust or insects? **Easy!**

The **dust and insect protection (SIS)** closes the key channel with two slats and is opened by inserting the key. Dust and insects cannot pass through.

SIS – available for revy 20 / 30

Differentiate keys?

Easy!

Never accidentally insert the wrong key again. The revy reversible keys can be easily personalized with **clips in four different colors**. So you can recognize your key at a glance by the color of your choice.

Save time and money?

Easy!

With revy, you are opting for a **durable and future-proof locking system** with dormakaba quality at a very good price.

You can obtain your revy locking cylinders and keys **quickly and reliably from your local dormakaba partner**. Your local partner is also the right address for duplicate keys or extensions to your locking system – **without long distances or delivery times**.

revy by **dormakaba**

Buying the right key system? Easy!

You should pay attention to these points:

- Is the system permanently protected by trademark and patent law?
- Do you only receive duplicate keys upon presentation of a security card?
- Does the cylinder protect against the most common opening methods?
- Does the key system meet the highest security standards?
- Is the system open for your access requirements, such as keyed alike locking cylinders or a locking system with different access rights?
- Are the locking cylinders available in different designs?
- Can you choose special functions that are important to you?
