dormakaba

1. Are your system hardware, firmware, software and media up-to-date?

2. Are components of your system obsolete and spare parts no longer available?

3. Are support and repairs no longer possible due to age?

4. Which of your system components support new functions and the latest security features?

Stay up-to-date and secure.
Benefit from a comprehensive analysis of your system.

The IT systems environment is changing at an ever-increasing pace.
At the same time, the threat of external attacks is growing, and strict data protection regulations require up-to-date system components and security features. We want to support you with ensuring your dormakaba system remains optimally protected and compliant with data protection regulations and also that any deviations are detected as quickly as possible.

A detailed analysis of your current software and hardware allows us to:
- Offer faster, more targeted assistance with support requests or malfunctions.
- If any deviations are detected, identify the affected system components (hardware, firmware, software and/or media) and develop suitable solutions.
- Check whether rapid technological change means that your system components can be compromised by potential attackers.
- Provide support with integrating new features such as CardLink, AOC or Mobile Access, as an analysis of your system will show us which parts need updating or replacing.
- Selectively target new external and internal developments to keep your system up-to-date.
- Quickly identify necessary updates and security patches for your system.
- Work with you to reduce time and effort and therefore reduce your costs.

What data we will need from you – and what we don't:
- dormakaba only needs data on the current status of your software and hardware.
- The data doesn't contain any person-related information, only device and system data – in full compliance with the General Data Protection Regulation (GDPR)
- We will be happy to provide you with and discuss the data at any time, so that you can check the contents and have maximum transparency.
- dormakaba undertakes to use the data solely for the purpose of system analysis.
- In accordance with the GDPR, you can view the data stored by dormakaba at any time and can withdraw your consent at any time.

Any further questions? Your dormakaba contact will be happy to provide you with all the answers. Contact us to stay up-to-date and secure.
